

TRUSTIA AI

MASTER INVESTOR PITCH DECK (SEPTEMBER 2026)

Company: Trustia AI Technologies (Dual-Use Autonomy Platform)

HQ: Istanbul Chamber of Commerce (İTO) BTM Fulya Deep-Tech Campus, Şişli / Istanbul, TR

Global Profile: crunchbase.com/organization/trustia-ai (Heat Score: 85, CB Rank: 534k)

Website: <https://trustia.com.tr>

Contact: Murat Furkan Bayram, Founder & Lead Systems Architect (kariyer@trustia.com.tr | +90 537 064 0460)

SLIDE 1: TITLE & HOOK

"The Deterministic Operating System for SAE Level-4 Autonomous Mobility in GNSS-Denied Environments"

- **Tagline:** Modular, deterministic Level-4 autonomous retrofit kits for commercial electric vehicle fleets and tactical defense platforms at 70% lower capital cost than bespoke robotaxis.
 - **Founding Team:** Murat Furkan Bayram (Founder & Lead Systems Architect, 100% Equity).
-

SLIDE 2: THE PROBLEM

"Modern Electronic Warfare Has Broken Traditional Robotics"

1. **GPS Denied / Jammed Battlefields:** Modern EW (Electronic Warfare) systems jam satellite navigation within seconds, leaving standard UGVs blind and disabled.
 2. **Lethal Asymmetric Threats:** Landmines, improvised explosive devices (IEDs), and tripwires cause 60%+ of ground robotics losses before mission completion.
 3. **Hardware Builders Lack Software:** 90%+ of vehicle manufacturers build great mechanical chassis, but lack the proprietary autonomy, SLAM, and AI detection stack to make them autonomous.
-

SLIDE 3: THE SOLUTION

"Trustia: The Full-Stack Autonomous Brain for Defense Vehicles"

- **GPS-Free 3D SLAM:** Centimeter-accurate navigation using LiDAR, Visual Odometry, and IMU pose-graph optimization with zero satellite dependence.
 - **Kinematic Hybrid A* & RRT*:** Sub-15ms dynamic trajectory generation respecting real vehicle physics (turning radius, slip angles, terrain gradients).
 - **AI Multi-Modal Threat Detection:** Real-time recognition and automated safety quarantine rings for Anti-Tank/Anti-Personnel mines, tripwires, UXO, and CBRN gas plumes.
 - **Plug & Play OEM Integration:** Compatible with any chassis via CAN-Bus, ROS 2, and NATO STANAG 4586 / SAE JAUS protocols.
-

SLIDE 4: PROPRIETARY TECHNOLOGY & CERTIFICATION

"Battlefield-Ready Architecture Verified by 1,301 Automated Tests"

- **100% Zero Third-Party Dependency Core:** Custom-built Python/C++ algorithmic stack, eliminating foreign backdoors and supply-chain vulnerabilities.
 - **Rigorous Test Coverage:** 1,301 automated unit, integration, deterministic, and scenario-matrix tests passing at 100%.
 - **Microsecond Determinism:** Real-time RTOS loops with hardware-level HMAC-SHA256 encrypted telemetry and Fail-Safe LinkLoss Return-to-Home (RTH).
 - **Standard Compliance:** Built strictly to NATO STANAG 4586 Level 4, SAE AS6091 (JAUS), and ISO 26262 ASIL-D functional safety principles.
-

SLIDE 5: PRODUCT ECOSYSTEM

"From Low-Level Actuation to Multi-Vehicle Swarm C2"

1. **Trustia Core Middleware:** Perception, SLAM, Hybrid A* Planner, Pure Pursuit / Stanley Controllers.
 2. **Trustia AI Defense Suite:** Ground-Penetrating Radar (GPR) fusion, thermal anomaly analysis, and 30m automatic hazard buffer generation.
 3. **Swarm Intelligence Engine:** Tactical multi-UGV coordination (Wedge, Line, Column, Diamond formations) with autonomous UAV-to-UGV target handoff.
 4. **Tactical C2 Command Console:** MIL-STD-2525 military map GUI for live fleet telemetry, mission dispatch, and instant hardware E-Stop.
-

SLIDE 6: BUSINESS MODEL & DUAL-LAYER PRICING

"Hardware Retrofit Kits & High-Margin Autonomy-as-a-Service (AaaS)"

- **Tier 1: Civil Commercial Level-4 Retrofit Kit (\$18,500 Kit / \$250/mo AaaS)**
Modular retrofit kit for urban shuttles, delivery platforms, and light utility vehicles.
- **Tier 2: Full Level-4 Robotaxi Turnkey Kit (\$35,000 Kit / \$450/mo AaaS or \$0.18/km)**
Designed for passenger EV fleets (Hyundai Ioniq 5). Delivers **70% CAPEX savings** and a **14-month full payback period (ROI)** for fleet operators.
- **Tier 3: NATO STANAG Defense UGV Hardened Kit (\$55,000 Kit / \$1,200/mo AaaS)**
Military-grade GPS-denied navigation, GPR threat rings, and ruggedized compute. Bespoke defense integration contracts: **\$250,000 – \$1,000,000**.

SLIDE 7: MARKET OPPORTUNITY

"\$34.8B Defense Robotics Market Surging at 14.2% CAGR"

- **TAM (Total Addressable Market):** \$34.8 Billion Global Defense Robotics & Unmanned Systems Market by 2030.
- **SAM (Serviceable Addressable Market):** \$8.2 Billion Military UGV Autonomy & GPS-Denied Navigation Software.
- **SOM (Serviceable Obtainable Market):** \$450 Million initial target across NATO allies, MENA defense contractors, and commercial autonomous utility fleets.

SLIDE 8: COMPETITIVE ADVANTAGE

"Why Trustia Wins Against Legacy Defense Giants"

Feature	Legacy Defense (Lockheed, General Dynamics)	Open Source (ROS Nav2, Autoware)	TRUSTIA AI
GPS-Denied Precision	Expensive (\$500K+ INS)	Unstable / Drifts	Centimeter 3D SLAM (\$0 GPS)
Mine / IED AI Quarantine	Separate Manual Systems	None	Native Automated Threat Rings
Integration Agility	Proprietary & Locked (Years)	Fragile Dependencies	Modular CAN / ROS2 / JAUS
Pricing & Margin	Multi-Million Cost-Plus	No Support / Uncertified	High-Margin Annual OEM SaaS
Code Verification	Black Box	Untested	1,301 Verified Tests (100%)

SLIDE 9: VERIFIED TRACTION & INSTITUTIONAL MILESTONES (SEPTEMBER 2026)

"Rapidly De-risked Across Defense, Global Capital & Commercial Pipelines"

- **Crunchbase Institutional Verification:** Officially verified organization (crunchbase.com/organization/trustia-ai) with Heat Score 85, CB Rank 534k, and active \$500k Pre-Seed round.
- **Z Fellows (Silicon Valley):** Selected for live partner interview with Grace Kasten (Partner at Pace Capital) on September 17, 2026 (\$10k equity-free grant & San Francisco residency).
- **Defense Industry Supplier Status:** Official supplier approvals and candidacies active at **BOTH** Turkish defense giants:
- **ASELSAN:** Software Engineering pre-evaluation **OFFICIALLY APPROVED** (0050569CCE941FD1A49FCEFB9B7BE7D6). Formally registered in the Potential Supplier Registry with enterprise SAP portal credentials (FZQHEXGFMTJU).
- **BAYKAR Teknoloji:** Official Supplier Application submitted for tactical autonomy and GPS-denied SLAM integration.
- **Trade Diplomacy & State Accreditation:**
- **DEİK (Foreign Economic Relations Board / Turkish Ministry of Trade):** Official corporate membership invitation received from the Digital Technologies Business Council to lead sovereign autonomous mobility export diplomacy.
- **European Commission (EU PIC Registration):** Trustia officially registered in the EU Participant Register with PIC Number 861711529, enabling direct access to Horizon Europe and EIT funding programs.
- **EIT Urban Mobility (European Institute of Innovation & Technology):** Official Partner ID CUS15554 assigned. €100,000 grant application submitted (Application ID: 3.1.02-1206-3732.3) under the 'Financial Support for Entrepreneurs 26-28' call.
- **QSTP (Qatar Science & Technology Park — Qatar Foundation, Doha):** Two separate applications submitted — \$30M Tech Venture Fund (9-page form) and official Incubation & Doha Sprint Program (8-page form, 4-week Doha residency with office, hotel, and Qatar company registration support).
- **ITO BTM (Istanbul Chamber of Commerce):** Contracted Resident Startup at Fulya Deep-Tech Campus.
- **TUBITAK ARBİS:** Registered National Researcher (TBTk-0229-6571).
- **KOSGEB:** Advanced Entrepreneurship Certified (KSB01UGE0115153370).
- **Global Deployment Pipeline:**
- **85+ Total Applications & Registrations** submitted across 15+ countries including Turkey, USA, UK, EU, Qatar, UAE, Saudi Arabia, Germany, and South Korea.
- **QSTP Doha Sprint:** 4-week in-person Doha residency with Qatar company incorporation support.
- **Dubai World Challenge for Self-Driving Transport (RTA):** Official applicant for the \$1,200,000 Level-4 Robotaxi Prize.

- **NEOM Autonomous Mobility (Saudi Arabia):** Official strategic investment and extreme-climate autonomous PoC application submitted.
-

SLIDE 10: THE ASK & USE OF FUNDS

"Raising \$500,000 Pre-Seed Round (SAFE at \$5M Post-Money Cap, 20% Discount)"

- **40% (\$200,000) — Physical Hardware & Sensor Fleet:** Full conversion of 2 Hyundai Ioniq 5 proving ground test vehicles and 27-part Level-4 sensor inventories.
- **30% (\$150,000) — Core Engineering Talent:** Embedded systems, 3D LiDAR SLAM, and ROS 2 engineers (18-month operational runway).
- **20% (\$100,000) — Proving Grounds & Field Track Operations:** Bilişim Vadisi track leasing, closed-course trials, **QSTP regional HQ setup in Doha**, and **EIT Urban Mobility co-funded proving ground expansion**.
- **10% (\$50,000) — IP & ISO 26262 ASIL-D Validation:** International PCT patent filings and automotive functional safety audits.

Join us in building the sovereign autonomous foundation of modern mobility.
