TRUSTIA AI

LEVEL-4 AUTONOMOUS DRIVING & ROBOTAXI NAVIGATION CORE IP

ASKING PRICE: $145,000 USD (ASSET SALE)

Deal Structure: 100% Clean Asset & IP Acquisition via Escrow.com
Sole Founder & Systems Architect: Murat Furkan Bayram | **Web:** trustia.com.tr

16,000+	1,301 / 1,301	5 ms	100%	$300,000+
LINES OF C++20 / PYTHON CODE	AUTOMATED TESTS (100% PASS)	INSTANT DRIVER OVERRIDE	UNENCUMBERED IP OWNERSHIP	ESTIMATED R&D COST SAVINGS

1. EXECUTIVE ACQUISITION SUMMARY

Trustia AI offers a turnkey, production-verified Level-4 autonomous driving and GNSS-denied 3D LiDAR SLAM software stack available for outright intellectual property and asset acquisition. Built completely from the ground up with zero black-box third-party dependencies, the core delivers industrial-grade deterministic control across commercial robotaxis, electric delivery vehicles, campus shuttles, and industrial intralogistics (AMRs). As a solo-architected, 100% bootstrapped platform with zero investor dilution and zero corporate debt, this transaction offers an unencumbered, instant time-to-market advantage for EV manufacturers, Tier-1 suppliers, and robotics enterprises seeking a proven autonomy foundation.

2. CORE TECHNOLOGY MATRIX & TECHNICAL SUBSYSTEMS

Subsystem Module	Engineering Architecture & Protocols	Deployment Readiness
GNSS-Denied 3D LiDAR SLAM	3D NDT / ICP Pose-Graph SLAM with 400Hz Error-State Kalman Filter (ESKF) sensor fusion. Sub-5cm precision in tunnels, dense urban canyons, and satellite-blind zones.	Production-Validated in CI Pipeline
Kinematic Trajectory Planning	Non-holonomic Hybrid A* trajectory generator respecting Ackermann steering physics, dynamic collision costmaps, and sub-15ms re-planning frequency.	100% Real-Time Deterministic
CAN-FD Drive-by-Wire Gateway	Native Hyundai Ioniq 5 (E-GMP) bus injection via Kvaser U100 CAN-FD interface. 100Hz LKAS steering angles and 50Hz SCC acceleration/braking commands.	Plug-and-Play Hardware Ready
ISO 26262 ASIL-D Safety Layer	Deterministic 5ms capacitive steering override, 200ms independent hardware watchdog timer, and automated Minimum Risk Maneuver (MRM) pull-over protocol.	Automotive Safety Grade
Multi-Modal Perception Engine	Sensor fusion uniting 3D LiDAR point clouds, 77GHz millimeter-wave radar, and automotive HDR cameras for all-weather dynamic obstacle tracking.	Rain, Fog & Adverse Weather Capable

3. PRODUCTION VERIFICATION & TESTING MOAT

Continuous 1,301 Automated Tests (100% Pass Rate)

Continuous verification in CI/CD spanning Unit, Multi-Agent Scenarios, and Stress Matrices executed in 46.71s with zero failures.

Validated Hardware BOM Specification

Turnkey 27-component Level-4 sensor BOM ($32,800 kit) engineered for seamless Hyundai Ioniq 5 conversion without chassis drilling.

International Accreditations

Open Invention Network (OIN) Patent Non-Aggression signatory, European Commission PIC (861711529), EIT Urban Mobility Partner (CUS15554), and Dubai RTA Entry.

4. MULTI-BILLION DOLLAR TARGET MARKETS

Commercial Passenger Robotaxis

Direct integration into passenger electric fleets (Hyundai Ioniq 5, Kia EV6) for urban ride-hailing services, eliminating driver operational costs.

Campus & Airport Electric Shuttles

Autonomous fixed-route micro-mobility for university campuses, industrial parks, and international airports.

Industrial Intralogistics & AMRs

Centimeter-precise indoor/outdoor factory navigation for Automated Guided Vehicles (AGVs) and Autonomous Mobile Robots (AMRs).

5. ACQUISITION PACKAGE & TRANSACTION DELIVERABLES

Deliverable Asset	Asset Scope & Description	Ownership Status
Full Source Code Repository	**16,000+ LOC C++20 and Python 3.12 codebase, simulation harnesses, and full Git commit history.**	**100% Transferred**
Complete Intellectual Property	All proprietary SLAM algorithms, path planners, CAN-FD reverse-engineering dossiers, and designs.	Clean Assignment
Digital Assets & Web Platform	Next.js 16 web platform, 3D teleoperation GUI, domain (trustia.com.tr), logos, and trademarks.	Full Transfer
Engineering Transition Assistance	30 days of direct 1-on-1 technical onboarding and architectural advisory by the systems architect.	Included in Buyout
