

TRUSTIA AI — SOSV / HAX DOSSIER

OFFICIAL APPLICATION DOSSIER // \$250,000 HARD-TECH & ROBOTICS ACCELERATOR

INVESTMENT: \$250,000 USD Direct Seed Check	CODE & TESTS: 1,281 TESTS (100%) 16K Lines Production	DEFENSE RATING: 100/100 PERFECT SSB & BTK Verified	INCUBATION: ITO BTM & TEKNOPARK Polat Tower & Cube GO
---	---	--	---

1. Elevator Pitch & Hard-Tech Problem Statement

TRUSTIA AI is a deterministic, hardware-agnostic Level 4 autonomy software stack and Drive-by-Wire kit that converts military ground vehicles (UGVs) and heavy robotics platforms into fully autonomous systems in 15 minutes, operating with sub-8cm precision in electronic warfare and GPS-denied environments.

The Problem: Off-the-shelf robotics stacks fail when GNSS is jammed. Furthermore, robotics and defense OEMs spend \$5M–\$15M and 2–3 years re-engineering custom autonomy stacks for every vehicle variant. Trustia eliminates this with a universal plug-and-play kit integrating a 400Hz ESKF filter, 3D LiDAR SLAM, and Hybrid A* planning.

2. Hard-Tech Moat & Technological Differentiation

400Hz GPS-Denied ESKF	Fuses 3D LiDAR + 400Hz IMU. Position drift <0.08m over 10km in electronic warfare theaters.	Anti-Jamming / Spoofing
15-Minute Plug & Play	Direct CAN 2.0B / CAN FD / SAE J1939 Drive-by-Wire interface. Zero mechanical redesign needed.	SAE J1939 / ISO 26262
1,281 Automated Tests	Zero external critical dependencies. Deterministic real-time cycle latency < 1.2 ms.	1,281 / 1,281 (100% PASS)
Multimodal Threat Isolation	LWIR Thermal (FLIR Boson) + Induction + GPR Radar fusion to isolate explosive hazards autonomously.	NATO STANAG 4586

3. Market Size & Enterprise Economics

- TAM (\$34.8B): Global military Unmanned Ground Vehicle (UGV) market + \$120B autonomous commercial robotics market by 2032.
- SAM (\$6.2B): NATO & allied nation autonomous ground vehicle retrofit and software modernization market.
- SOM (\$180M): Initial capture across 1,200 vehicles in Turkey, US, and Europe over 5 years.

Total Revenue (\$)	\$240,000	\$1,150,000	\$3,800,000
Hardware Kits Deployed (\$80k-\$220k)	6 Vehicles (PoC)	35 Platforms	140+ Platforms
Annual C2 / SaaS Licenses (\$15k-\$35k)	\$90,000	\$525,000	\$2,100,000
Gross Margin (%)	84%	87%	91%
Team Size (Engineers & Operations)	4 Team Members	9 Team Members	20 Team Members

4. Founder & Credentials

- Founder & Chief Executive Officer (CEO): Murat Furkan Bayram.
- Incubator Backing: Admitted to Istanbul Chamber of Commerce BTM Incubator (Polat Tower, Istanbul).
- Defense Tech Hub: Candidate technology firm in Teknopark Istanbul (Cube Incubation / Cube GO).
- Defense Industry Excellence Rating: 100/100 Perfect Grade by Turkish Presidency of Defense Industries (SSB & BTK, ID: L2zPtN4X1ZJ).
- Certified Advanced Entrepreneur: Accredited by the Ministry of Industry and Technology (KOSGEB KSB01UGE0115153370).
- National R&D; Registry: Registered in TÜBİTAK ARBİS (TBTK-0229-6571). Active ASELSAN Defense Supplier Portal Registration.

5. Why SOSV / HAX & Robotics Scaling Strategy

WHY HAX: HAX is the undisputed #1 global robotics ecosystem. Trustia will utilize HAX’s Newark/SF labs to mass-produce hardened Drive-by-Wire retrofitting ECUs and deploy Level 4 UGV fleets globally.

PORTAL SUBMISSION: Direct submission at sosv.com/apply/hax with this dossier attached.
