

DUBAI WORLD CHALLENGE

FOR SELF-DRIVING TRANSPORT — OFFICIAL ENTRY DOSSIER

Authority: Roads and Transport Authority (RTA Dubai)

Prize Pool: \$1,200,000 USD (Top Prize)

Status: Submitted & Confirmed (Sept 2026)

1. COMPETITION SUBMISSION & VERIFICATION PARAMETERS

PARAMETER	OFFICIAL SUBMISSION DATA (RTA NETSUITE / CHALLENGE PORTAL)
Host Organization	Government of Dubai — Roads and Transport Authority (RTA)
Competition Theme	Dubai World Challenge for Self-Driving Transport 2027: Autonomous Mobility & Smart Infrastructure
Total Cash Prize	\$1,200,000 USD (~42 Million TL)
Applicant Entity	Trustia AI Technologies (Murat Furkan Bayram, Lead Systems Architect)
Category	Category 1: Solution Providers / Commercial Autonomous Vehicle Software
Submission Status	SUBMITTED / GÖNDERİLDİ — TAMAMLANDI
Next Milestone	November 2026: Announcement of Official Finalists by RTA International Jury
Proving Ground Finals	September 2027: Live Vehicle Track Trials & World Congress Award Ceremony in Dubai

2. TECHNICAL ARCHITECTURE DEPLOYED FOR RTA DUBAI

Hyundai Ioniq 5 E-GMP Platform Adaptation for Middle East Climate:

- Extreme Heat & Sandstorm Durability (50°C):** Ouster OS2-128 and Livox Mid-360 LiDARs rated to IP68/IP69K. Dual Continental ARS 408-21 77GHz long-range radars provide continuous penetration through severe dust, fog, and sandstorms.
- Sub-15ms Dynamic Collision Avoidance:** Real-time Kinematic Hybrid A* trajectory planner ensures 50ms emergency reaction envelope for Vulnerable Road Users (VRUs - pedestrians, cyclists, e-scooters).
- C-V2X & Dubai Pulse Integration:** Teltonika RUTX50 5G router streams real-time telemetry via MQTT to municipal traffic operations centers with sub-20ms latency.

3. SYNERGIES WITH MENA DEPLOYMENTS (DUBAI & QSTP DOHA)

Trustia's participation in the Dubai World Challenge directly complements our active **\$30M Venture & 4-week Sprint Incubation application at Qatar Science & Technology Park (QSTP Doha)**. The Gulf region represents Trustia's primary international testbed for zero-driver passenger fleets, supported by the UAE and Qatar's vision for 25% autonomous trips by 2030.
