

TRUSTIA AI

EXECUTIVE ONE-PAGER / COMPANY TEASER (2026)

Company: Trustia AI (Dual-Use Autonomy Platform)

Website: https://trustia.com.tr | **HQ:** İTO BTM Fulya Campus, Şişli / İstanbul, TR

Founding Team: Murat Furkan Bayram (Founder & CEO), Doğukan Bayram (Co-Founder & Operations)

Email: iletisim@trustia.com.tr | kariyer@trustia.com.tr

Industry: Defense Technology, Level-4 Robotaxi Mobility & Autonomous Navigation

EXECUTIVE SUMMARY

Trustia AI develops the core autonomy operating software for Unmanned Ground Vehicles (UGVs) and passenger electric vehicles operating in **GPS-denied, electronic-warfare-heavy, and dense urban environments**.

While vehicle manufacturers build robust physical hardware, they lack the proprietary software stack required for true commercial autonomy. Trustia bridges this gap by providing a **hardware-agnostic, zero-external-dependency software brain** that integrates centimeter-level 3D SLAM, kinematic trajectory planning, multi-modal IED/mine AI detection, and drive-by-wire actuation into any vehicle via standard CAN-FD and ROS 2 protocols.

THE CORE TECHNOLOGY MATRIX

+-----+		
TRUSTIA AUTONOMY STACK (CORE)		
+-----+		
1. GPS-Denied 3D SLAM	Centimeter-accurate LiDAR & Visual Odometry	
2. Kinematic Hybrid A*	Sub-15ms dynamic route generation with slip angles	
3. AI Threat Defense	GPR & Thermal detection for IEDs, Mines, CBRN gases	
4. Tactical Swarm C2	Multi-UGV Wedge, Line, Column & Diamond formations	
5. Cyber & Fail-Safe	HMAC-SHA256 encrypted telemetry, 3s LinkLoss RTH	
+-----+		
STANDARDS: NATO STANAG 4586 Level 4	SAE AS6091 (JAUS)	ISO 26262 ASIL-D Safe
+-----+		
'''		

PROVEN TRACTION & TECHNICAL VALIDATION

- 1,301 Automated Tests Passing (100%):** Complete coverage across Unit, Integration, Determinism, and Scenario Matrix pipelines.
- 50/50 Extreme Mission Simulation Campaign:** Zero collisions and 100% mission completion rate across patrol, GPS-denied, obstacle, and combat logistics scenarios.
- Battle-Ready C2 Console:** MIL-STD-2525 tactical desktop command GUI deployed for live fleet control.
- Institutional Governance:** Clean founder equity (Murat 80%, Doğukan 20%) and KOSGEB / Defense Academy certifications.
- 85+ Global Applications:** Over 85 institutional applications and registrations submitted across 15+ countries (USA, UK, EU, Qatar, UAE, Saudi Arabia, Germany, South Korea, Turkey).
- European Union Project Registration:** Official EU Participant Identification Code (PIC: 861711529) via European Commission. Partner ID CUS15554 at EIT Urban Mobility. €100,000 grant application submitted (ID: 3.1.02-1206-3732.3).
- Qatar Foundation QSTP:** Two applications submitted — \$30M Tech Venture Fund and 4-week Doha Sprint Incubation Program.
- Z Fellows (Silicon Valley):** Selected for live 10-minute Zoom interview with Grace Kasten (Partner at Pace Capital, \$10k equity-free grant).
- Defense Supply Chain Pipeline:** Official software supplier pre-evaluation APPROVED at ASELSAN (0050569CCE941FD1A49FCEFB9B7BE7D6 • Potential Supplier with SAP Portal Access) and active supplier candidacy at BAYKAR Teknoloji.
- Commercial Diplomacy & Global Export:** Official corporate membership invitation received from Foreign Economic Relations Board of Turkey (DEİK) Digital Technologies Business Council under the Ministry of Trade.
- Crunchbase Verified:** Heat Score 85, CB Rank 534k, Active \$500k Pre-Seed round (crunchbase.com/organization/trustia-ai).

BUSINESS MODEL & DUAL-LAYER PRICING

- **Tier 1: Civil Level-4 Kit:** \$18,500 Kit (BOM: \$11,500) | \$250/mo AaaS subscription.
 - **Tier 2: Robotaxi Turnkey Kit:** \$35,000 Kit (BOM: \$22,800) | \$450/mo AaaS or \$0.18/km (14-Month Payback).
 - **Tier 3: NATO Defense UGV Kit:** \$55,000 Kit (BOM: \$32,800) | \$1,200/mo AaaS | \$250,000 – \$1,000,000 Bespoke PoC.
-

TARGET MARKET & COMPETITIVE MOAT

- **\$2.3T TAM:** Combined Global Autonomous Mobility & Defense Robotics Market by 2030.
 - **Proprietary Moat:** 100% zero third-party library dependencies (AST-audited), eliminating foreign backdoors and licensing liabilities.
-

THE INVESTMENT OPPORTUNITY

- **Target Round: \$500,000 Pre-Seed** via SAFE note (Valuation Cap: **\$5.0 Million Post-Money**, 20% Discount).
 - **Capital Allocation:** 45% (\$225k) Hardware & Sensor Test Fleet | 35% (\$175k) Core Engineering (18 Months) | 15% (\$75k) Proving Grounds & Field Trials | 5% (\$25k) IP & ASIL-D Validation.
