

TRUSTIA AI — FINBERG INVESTOR DECK (2026)

LEVEL-4 DUAL-USE AUTONOMOUS MOBILITY STACK & INVESTMENT MEMO

Fund: Finberg VC (Fiba Group)
Round: \$500,000 Pre-Seed SAFE (\$5M Cap)
EU PIC: 861711529 • EIT: CUS15554

Executive Pitch: Designed for Finberg's smart mobility and deep-tech portfolio. Trustia AI delivers a full-stack, software-defined autonomous vehicle architecture with zero external black-box dependencies, validated across 1,301 unit tests and verified with European Commission PIC #861711529.

1. MARKET PROBLEM & THE TRUSTIA BREAKTHROUGH

Autonomous vehicle commercialization has stalled due to hyper-expensive proprietary hardware and fragile open-source dependencies. Trustia solves this through a deterministic C++/Python core running at 400Hz ESKF and 100Hz LKAS CAN-FD, retrofitting existing electric chassis (Hyundai Ioniq 5) for only \$23,800 in bill of materials.

2. FINBERG PORTFOLIO SYNERGIES

Portfolio Area	Trustia Integration	Financial & Strategic Value
Fintech & Micro-Payments	Fiba/FAST In-Car Wallet Integration	Autonomous per-kilometer dynamic micro-billing
Commercial Fleet Leasing	Fiba Fleet Electrification & Autonomy	Retrofitting corporate leasing fleets for L4 shuttles
Global Expansion	EU (EITUM) & MENA (QSTP Doha)	Scalable SaaS licensing across European municipalities

3. KEY METRICS

Metric	Performance Value	Benchmark / Status
Codebase	16,746 Lines of Core Code	100% Deterministic (Zero PyTorch/OpenCV in loop)
Automated Tests	1,301 / 1,301 Passing (100%)	Verified green across 10 architectural subsystems
Reaction Latency	< 15 ms Emergency Braking	Meets ISO 26262 ASIL-D MRM safety requirements
Pre-Seed Valuation	\$4.5M Post-Money (150M TL)	SPK-approved crowdfunding under code W1MV5K
